## CONFERENCE DESCRIPTION

In the current era of spiraling medical costs, with growing emphasis on the provision of cost-effective medical care, it has become increasingly important for **Primary Care providers to become adept at evaluating and treating GYN/Women's Health issues.** This conference will provide you with a practical, clinical update on a full range of women's health issues, including the diagnosis and management of common gynecologic complaints, contraception, depression, menopause, uterine bleeding, and endocrine disorders. In-depth small group breakouts are included, which will instruct and allow you to develop and refine your skills on endometrial biopsy, basic colposcopy, advanced colposcopy, IUD insertion/removal, and management of common oral contraceptive pill (OCP) problems. The goal of this conference is to increase knowledge and enhance the competence of attendees. Emphasis will be placed on practical application of the evidence-based topics presented.

Topics for this year's conference have been selected based on the educational needs determined from the identified professional practice gaps. The gaps were derived from a variety of sources including evaluations and outcomes data from past participants; clinical expert input; Symposia Medicus' online survey; and other medical and nursing data.

Conference format will include didactic lectures, smaller group breakout and interactive sessions, case studies, and question and answer sessions.

Smaller group sessions will be held Friday afternoon. These breakout sessions are organized to provide **greater participant/faculty interaction**, and will give you an opportunity to participate in discussions on subjects relating to your particular area of interest. **Please indicate your breakout session topic choices on the conference registration form in this brochure.** Space is limited so please reserve early.

An outstanding faculty has been assembled for this conference. Each member was selected based on their individual area of expertise and ability to communicate current, evidence-based, and practical information to participants.

You are sure to enjoy our **27<sup>th</sup> Annual Conference on Office Gynecology & Women's Health for the Primary Care Provider** while sharing ideas and experiences with colleagues from across the country in the beautiful setting of Oahu.

## CONFERENCE OBJECTIVES

As a result of participating in this conference, you should have increased knowledge and enhanced competence to...

- Manage abnormal Pap smear results based on the latest ASCCP and ACOG guidelines
- Distinguish between different types of urinary incontinence
- Explain the natural history of herpes simplex infections and the relationship to patients' symptoms and transmissibility
- Distinguish which patients with bone mineral density loss should be considered for pharmacologic therapy
- Review current guidelines for HPV vaccinations
- Clinically diagnose endometriosis
- Identify risk factors for major depression

## ATTENDEE REQUIREMENTS

At the conclusion of attending this conference, participants are entitled to a certificate of credit which will be available online.
