CONFERENCE DESCRIPTION

This comprehensive conference on **Fetal Monitoring** has been designed for physicians, nurses, nurse midwives, nurse practitioners, and PAs who are responsible for maternal-fetal assessment. Our conference will integrate current clinical research with case studies and fetal heart tracings for content reinforcement. The conference is comprehensive and dynamic and will include controversial issues relating to maternal-fetal assessment. The goal of this conference is to increase knowledge and enhance the competence of attendees.

Topics for this year's conference have been selected based on the educational needs determined from the identified professional practice gaps. The gaps were derived from a variety of sources including evaluations and outcomes data from past participants; clinical expert input; Symposia Medicus' online survey; and other medical and nursing data.

Conference format will include didactic lectures, smaller group breakout and interactive sessions, case studies, and question and answer sessions.

Smaller group sessions will be held Thursday afternoon. These breakout sessions are organized to provide **greater participant/faculty interaction**, and will give you an opportunity to participate in discussions on subjects relating to your particular area of interest. **Please indicate your breakout session topic choices on the conference registration form in this brochure.** Space is limited so please reserve early.

An outstanding faculty has been assembled for this conference. Each member was selected based on their individual area of expertise and ability to communicate current, evidence-based, and practical information to participants.

You are sure to enjoy our **21st Annual National Conference on Fetal Monitoring** while sharing ideas and experiences with colleagues from across the country in the exciting setting of Las Vegas.

CONFERENCE OBJECTIVES

As a result of participating in this conference, you should have increased knowledge and enhanced competence to...

- Explain to patients the reasons why antenatal testing is necessary
- Recognize recordkeeping pitfalls and how to overcome them
